

NK87™

Manufacturing Standards

The following are items that fall within our normal manufacturing standards, and are to be expected with the purchase of this product.

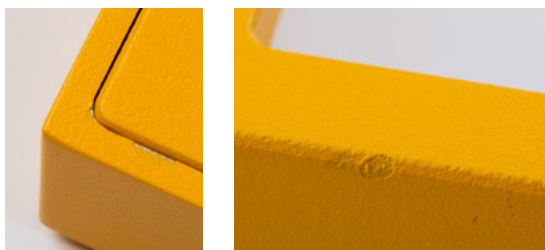

Switch Tightness

Due to slight variations between switches, some switches may experience more tightness than others while being inserted into the plate.

Stabilizer Rattle

The included stabilizers may rattle and have noise. This can be reduced by tuning and lubricating.

NovelKote™ Coatings

Due to the natural texture and nature of this coating, some unevenness may be present, and minor chipping may be present at the seams.

Other Finishes

White: This coating is not a pure white, and a slight off-white is the nature of coating

Anodizing: Slight streaking may present in certain places.
