

## NK87™ Plates

### Manufacturing Standards

The following are items that fall within our normal manufacturing standards, and are to be expected with the purchase of this product.

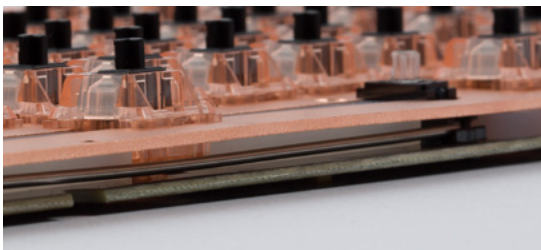

### Rough Cuts

Some of the cuts around the plate may be uneven or rough.

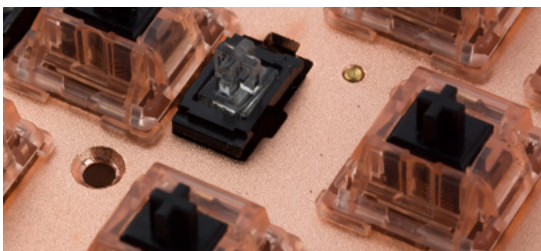

### Blemishes

Imperfections may be present on the surface of the plates. Slight discolorations, oil, or residue are possible.

### Warping

Thinner areas of the plates may exhibit some minor warping on their own. Once pressure is applied during the install these should flatten and not impact the typing experience.

### Tight Fit

Certain areas of the plates will be a tight fit—primarily around the stabilizers. You may need to apply some pressure to get them inserted. It is recommended to use these plates with PCB mount stabilizers only.
