● Light Grey / RAL 7044

● Blue / RAL 5007

● Beige Red / RAL 3012

● Natural Oak

What is Riverstone? Riverstone is a composite material made up of marble pebbles or pieces of natural stone in different sizes, bound together with a transparent white or coloured resin. The surface of the stones is completely free of paints or resins since they are treated with a water-repellent waxy surface that protects the material from stains and its extremely easy to maintain.
