- **DO** use the appliance's handles and knobs.
- **DO** use oven mitts when removing accessories.
- **DO** place hot accessories on a heat-resistant surface or cooking plate.

Air Frying Cautions

When the air fryer is in operation, hot air is released through the air vents. Keep your hands and face at a safe distance from the air vents and take extreme caution when removing hot accessories from the appliance. Failure to do so may result in personal injury and/or property damage.

While cooking, the internal temperature of the appliance reaches very high temperatures. To avoid personal injury, never place unprotected hands inside the appliance until it has cooled to room temperature.

- **DO NOT** use a ceramic-coated or stoneware pot (such as CorningWare stoneware) for air frying.
- **DO NOT** block the vents on the air fryer. Leave at least 13 cm of space around the air fryer when in use.
- **DO NOT** place the appliance on a stove.
- **DO NOT** operate the appliance on or near combustible materials such as tablecloths and curtains.
- **DO NOT** cover the air vents while the air fryer is in operation. Doing so will prevent even cooking and may cause damage to the appliance.
- **DO NOT** overfill the air fryer. Overfilling may cause food to contact the heating element, which may result in fire, property damage, and/or personal injury.
- **DO NOT** pour oil into the cooking container. If needed, spray food lightly with non-stick cooking spray. Using cooking oil could result in personal injury and/or property damage.

- **DO NOT** store any materials in the appliance when not in use.
- **DO NOT** place any combustible materials in the appliance, such as paper, cardboard, plastic, Styrofoam or wood.
